Mais de 40% dos trabalhadores dos transportes e comunicações de Portugal acredita que o stresse afeta negativamente a sua saúde e segurança. Cerca de 79% dos gestores europeus estão igualmente preocupados com o stresse do trabalho.

Segundo a Agência Europeia para a Segurança e a Saúde no Trabalho o principal obstáculo à prevenção dos riscos psicossociais nas empresas portuguesas é, sem dúvida, a falta de recursos (65% dos casos), embora estejam sensíveis às exigências legais sobre a matéria.

Sessão de Lançamento da Campanha Europeia de Avaliação de Riscos Psicossociais

O Comité dos Altos Responsáveis da Inspeção do Trabalho (CARIT), com representantes de todos os Estados da UE, acordou na realização de uma Campanha Europeia de inspeção sobre a avaliação dos riscos psicossociais, a decorrer em 2012.

Em Portugal esta Campanha está a ser desenvolvida pela Autoridade para as Condições do Trabalho.

Com vista ao aprofundamento de alguns dos temas mais pertinentes desta campanha, nomeadamente o assédio moral, o stresse e a violência nos locais de trabalho, foi realizada a Sessão de Lancamento da Campanha em Lisboa, destinada a inspetores do trabalho, trabalhadores da ACT e de outros organismos da Administração Pública, profissionais da saúde, técnicos de segurança no trabalho, parceiros sociais, empresas e outras organizações da sociedade.

Este seminário foi a primeira de várias ações de sensibilização que a ACT irá levar a efeito sobre esta temática no decurso do presente

A Sessão de Lançamento da Campanha, teve lugar no dia 6 de Março de 2012, no Auditório do Instituto do Emprego e Formação Profissional, em Lisboa.
